Summary

I'm Paul Ikenna, a Front-End Web Developer from Abia State, Nigeria.

I have worked with Javascript, React js and Next Js for more than a year now, which i have solid experience in building front-end websites and web applications.

I am a self taught front-end engineer and I would be glad to accept an internship offer to broaden my knowledge and learn new things, most especially working with teams.

As part of my learning process, I write articles, document my journey and also create contents for a South Africa music website.

I have good experience in front end technologies such as HTML, CSS, Bulma, Javascript, React j, Next js, Wordpress and wordpress seo optimization.

I currently have a wordpress site that is active and generating lots of traffic (SAbaze.com).

Experience:

1. **Admin Manager @ SAbaze:**

   South Africa music website (SABaze.com)

As Part of the team that built SAbaze, I became the Admin Manager and also gained strong knowledge in setting up google search Engine optimization (SEO)

2. **Front-End Web Developer:**

   Innovation Growth Hub (IGhub)

   Aug 2022 - May (2023)

   I got the opportunity to be part of a community (IGhub) in Aba, Abia State. There I sharpened my skill more by building projects with her front-end web development team.

Education:

. Computer Science

Nation Open University Of Nigeria (NOUN)

. Front-End web Development

Udemy.

<u>Hobbies</u>:

Web surfing

Football
